

No. 26 – San Diego Integrated Regional Water Management Region

Region Acceptance Process Summary

General Description of Region

The San Diego Integrated Regional Water Management (IRWM) Region is located in the western portion of San Diego County, in the southwestern corner of California. The boundaries of this Region are the San Diego County line to the north, the United States/Mexico International Border to the south, the crest of the Laguna Mountains to the east, and the Pacific Ocean to the West.

The San Diego RWMG collaborates with the South Orange County and Upper Santa Margarita IRWM Regions through a Tri-County Funding Area Coordinating Committee that was established through a Memorandum of Understanding (MOU) between the agencies. The committee formed by the MOU maximizes the opportunities for integrated water management activities in the watershed, which is shared by these three IRWM Regions.

Interview Conclusions- Approved

No changes to this Region's boundaries are suggested by DWR. DWR requires that the San Diego RWMG continue to engage the South Orange County and Upper Santa Margarita IRWM Regions through their Tri-County Funding Area Coordinating Committee.
